

Boxphish Service Overview

Boxphish's cyber security & awareness training software is designed to **improve the online security** knowledge of end users and reduce their level of risk – this is achieved via email threat simulation and on-going, diverse training.

Cyber awareness training should form a key part of any **cyber security strategy**.

The Facts

83% of all cyber attacks involve phishing

92% of **malware** is delivered via email

14% of global phishing is aimed at Office 365 account takeovers

86% of organisations currently don't invest in cyber awareness

65% of organisations have identified breaches or attacks in the last 12 months

Over **90%** of cyber attacks involve human error

Organisations that are targeted, on average receive at least **one attack per week**

77% of organisations say cyber security is a high priority
