Net-Ctrl

Net-Ctrl is a leading UK value-add reseller. Our mission is to provide technology solutions and services that enable our customers to exist safely and efficiently in a complex digital world. We have been operating for over 10 years and developed expertise in network and physical security, data storage and wireless solutions.We design, install and support a hand-picked range of enterprise solutions that we believe truly deliver in the workplace.

Our passion for technology and customer service sets us apart from the competition.

Networking

aruba NETWORKS an HP company

Aruba has been at the forefront of innovation combining over 18 years of proven wired and wireless network expertise including Aruba AI that can identify anomalies and provide prescriptive recommendations that network administrators can trust. Aruba has repeatedly been recognised by third party analysts as a leader in Wi-Fi, switching, SD-Branch, and a visionary in Data Centre networking. The world's largest companies rely on Aruba to provide a secure, AI-powered edge services platform that spans across campus, branch, data centre, and remote working environments.

Allied Telesis

Allied Telesis engineers high-performance, high-quality, future-proof products to meet requirements for enterprise, campus, branch, and private cloud networks. In addition, Allied Telesis Management Framework™ (AMF), decrease network operating expenses by automating and simplifying many day-to-day tasks. Allied Telesis also produces top-of-rack switches for the enterprise data centre market, extended temperature products for industry, and unmanaged and WebSmart switches for small and medium business.

JUNIPER NETWORKS

Juniper Networks has established itself as one of the leading technology solution providers in its field. They provide a range of innovative hardware and software solutions that meet the demanding criteria for an organisation of any size. Net-Ctrl is a UK reseller of some select Juniper Networks solutions including their service gateways, virtual firewall and switching solutions

COMMSCOPE® RUCKUS®

When connectivity really matters, organisations turn to RUCKUS. Whether you're challenged with high client density, unfriendly- Wi-Fi building materials or just rising employee or customer expectations RUCKUS can help. Every RUCKUS access point is packed with patented technologies that go beyond the everyday to ensure superior connections and awesome user experiences. The RUCKUS ICX family of fixed form-factor switches work seamlessly with the RUCKUS portfolio to deliver the most performance and cost effective unified wired and wireless access solutions on the market today. Together they simplify network set-up and management, enhance security, minimize troubleshooting, and make upgrades easy.

Cyber Security

BOXPHISH

Boxphish has become a leading player in the Cyber Awareness Market, delivering thousands of simulations and education journeys monthly. The Boxphish mission is simple, they want to make our clients more cyber aware. They achieve this by identifying risk areas and potential vulnerabilities within your ecosystem and running simulations and education to inform and reduce that risk. In over 90% of cyber attacks, there is a human element that has failed. Their mission is to turn your people into the equivalent of a human firewall.

paloalto NETWORKS

Palo Alto Network are the global cybersecurity leader, known for always challenging the security status quo. Their pioneering Security Operating Platform safeguards your digital transformation with continuous innovation that combines the latest breakthroughs in security, automation, and analytics. By delivering you a true platform and empowering a growing ecosystem, Palo Alto Networks provide you with highly effective and innovative cybersecurity across clouds, networks, and mobile devices.

FORTINET®

Fortinet empowers its customers with intelligent, seamless protection across the expanding attack surface and the power to take on ever-increasing performance requirements of the borderless network—today and into the future. Only the Fortinet Security Fabric architecture can deliver security without compromise to address the most critical security challenges, whether in networked, application, cloud, or mobile environments. Whether you need to deploy a High-Performance Data Centre Firewall, an Enterprise Next Generation Firewall or a smaller UTM device, there is a FortiGate physical or virtual appliance to fit your unique Network Security requirements. Fortinet combine the FortiOS™ Operating System with custom FortiASIC™ processors and the latest-generation CPUs to provide advanced protection from sophisticated, highly targeted attacks, without becoming a network bottleneck.

THALES Building a future we can all trust

Thales is the worldwide leader in data protection solutions, providing everything an organisation needs to protect and manage its data, identities and intellectual property with comprehensive data discovery and Thales positioning classification, data encryption, tokenisation, advanced key management, authentication, and access management. Whether it's securing the cloud, digital payments, blockchain or the Internet of Things, security professionals around the globe rely on Net-Ctrl and Thales to confidently accelerate an organisation's digital transformation.

Pulse Secure® Acquired by Ivanti

Pulse Secure are the company that is 100% focused on delivering secure access solutions for people, devices, things and services. For years, enterprises of every size and industry have been trusting their integrated virtual private network, network access control, mobile security and application delivery solutions to enable secure access seamlessly in their organisations and to empower digital transformation.

RUCKUS® CLOUDPATH

Cloudpath Enrollment System is a cloud service (or on-premises software) that delivers secure network access for any user, and any device, on any network. Utilising a variety of powerful safeguards to make sure every connection is secure. These include encryption for wireless data in transit, an up-front security posture check before users connect, policy-based access so users get the right level of access, and more. BYOD and guest users can connect to the network quickly and easily with self-service workflows accessed via a customisable onboarding portal. IT teams see a dramatic decrease in helpdesk tickets related to network access and are free to focus on strategic projects.

Building Management

Bodet

Bodet Lockdown Alert System offers a unique customisable emergency alert, differentiated from other broadcast alerts such as evacuations, fire alarms or daily events. These can be triggered via a range of remote or local wired methods. This allows clear communication, improving the safety of both pupils and staff. The system operates on your existing IT network using Power over Ethernet (PoE). Each school has different needs and priorities. Our skill is in devising and installing School Alert, Class Change and Synchronised Clock Solutions that match both requirements and budget.

tyco | CEM Systems

CEM Systems is a leading provider of access control and fully integrated security management systems. CEM are one of the few manufacturers that design and produce all their own hardware and system software, CEM can fully customise solutions depending on customer requirements. With a reputation for designing and developing industry firsts, CEM continuously develops hardware to incorporate the very latest in technology

tyco | Cloudvue

Cloudvue solutions improve security operations and drive operational efficiency, worldwide– every day. Today, thousands of businesses and organizations trust Cloudvue to simplify surveillance, streamline access control, and provide powerful intelligence that improves security operations and helps with organizational efficiency. This makes Cloudvue the leading experts in cloud video surveillance and provides a proven track-record for reliability.

commend

The Commend product portfolio covers every Intercom need, from door intercom systems to complex integrated solutions. Commend's building-block design concept ensures that all of the various security systems like CCTV, Access Control, Mobile Radio etc. combine to form a single, easy-to-use-and-manage platform

tyco | Illustra

Illustra cameras and exacqVision recording systems are available under the Tyco brand umbrella and have been designed to work together to provide a seamlessly integrated solution. The Illustra Pro camera line is a premiere IP camera offering with resolutions from 2MP to 12MP and form factors of compact mini-dome, mini-dome, bullet, micro, fisheye, and PTZ. The Illustra Pro cameras feature advanced video intelligence analytics designed to augment the overall system while off-setting computing from the VMS. exacqvision Video Management Systems (VMS) scales from a low cost option for standalone installs to large scale installations providing a high level of situational awareness and system health

tyco | Kantech

Kantech (part of Tyco Security Products) designs, markets and supports integrated access control technologies that are ready to use right out of the box. Kantech's solutions provide a compact, entry-level solution for smaller businesses while the EntraPass access control software combines with the powerful KT series door controllers to provide enhanced capabilities for enterprise scale applications. Kantech offers a full suite of access control products that are reliable, easy to install and easily scalable.

MOBOTIX BeyondHumanVision

MOBOTIX is a world renowned manufacturer of High resolution IP-CCTV and video technology. It is particularly known for its decentralised concept that reduces the overall cost to the customer and sees each camera as an independent component and one that doesn't require a computer to manage it. All of the MOBOTIX cameras are able to move, detect, record and store video whilst alerting the user via email or VoIP(voice over internet protocol).
